

# High Volume

Equipment designed for the high volume delivery of oils and lubricants.

## OPEN HOSE REEL

High volume hose reels - 15m x 3/4" hose capacity  
Double arm, high volume automatic rewind hose reels for air, water or oil. All metal Heavy Duty reinforced construction. Full port 3/4" shaft and swivel for no flow restrictions. Effective hose coiling mechanism by means of a special steel spring provides a long life and trouble free operation. The reel does not require any special maintenance.

**PART No. 505200**

## HIGH PRESSURE IN-LINE METER

High pressure, up to 70 bar (1,000) psi, high-volume, up to 40 litres per minute (10.5 gallons per minute) piston oscillating meter. Can be used with all types of lubricants up to SAE 140. Inlet outlet thread 3/4" BSP (F). ACCURACY: + - 1%.

**PART No. 366800**

## HIGH PRESSURE OIL PUMPS - 5:1 RATIO

High pressure air operated pumps for the distribution of all types of light and heavy viscosity oils through pipework, hose reels and meters. High output allows simultaneous operation when used with multi outlet systems. Recommended for medium flow-high counter pressure.

Pumps may be wall, drum or tank mounted using appropriate accessories.

**PART No. 347 100**

## HIGH PRESSURE OIL PUMPS - 10:1 RATIO

High pressure air operated oil pump for long distance transfer and high output. Recommended for low temperatures or in situations where a weak pressure limits its output. Also recommended for long distance installations needing high output and with up to four distribution points working simultaneously. Flange fixing. Can be used with bung adaptor reference 360 006.

**PART No. 343 000**

## OIL CONTROL VALVE

High volume control valve for dispensing high volumes of lubricant oil up to SAE-140. Unique two-way valve operation allows controlled delivery of either small quantities of oil when partially opened or up to maximum volume when fully opened. Lockable trigger for easier delivery of high volumes of lubricant. The control valve is heavy duty and has a reliable built in ball bearing swivel which eliminates hose rigidity when under pressure.

**PART No. 363051**
