Oil Supply System for two 205Ltr. Drums

Compact system for the supply of two types of oil in workshops with no installation.

Ready to use unit. No need for pipe lines as all components are factory mounted.

Compact design allows easy location. Can be placed in any existing service bay. Easy transportation to a new location without dismantling.

Improves the image of the workshop by reducing the handling of packages, covering the drums from sight and improving the environmental protection.

The unit has a metal worktop to be used as a workbench and can include a tool cabinet with security lock as an option.

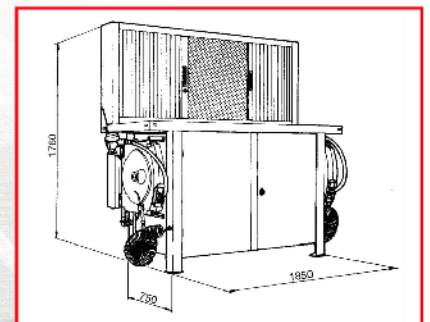

The system includes:-

- Two 3:1 ratio air operated oil pumps
- Two enclosed oil hose reels with 8m hose
- Two electronic metered oil control valves
- Two air distribution outlets with tyre gauge and blow gun

*Tool board optional

Part Number	Description
450000	Oil distribution system for two 205ltr drums with metered control valves.
450001	Oil distribution system for two 205ltr drums with lockable shutter.
Options	
281501	Tool Cabinet 1,750mm long
282501	Tool Board 1,750mm long

The system can include, as an option, an Oil Monitoring System.
