

# Oil Pumps

Tank, drum or wall mounted pumps for all types of lubricant oils.

Part No.  
1:1 - 351110  
3:1 - 353110

Part No.  
1:1 - 352100  
3:1 - 354100

## PUMP MASTER 2 OIL PUMPS

- ▶ Double acting air operated pumps for lubricants.
- ▶ Available with two different pressure ratios:-  
1:1 low pressure, high output and 3:1 medium pressure..
- ▶ All pumps include a 2" BSP height adjustable bung adaptor.

### 1:1 Pressure Ratio Pumps.

Low pressure, high delivery air operated pumps for transferring lubricants and other fluids. Recommended use: large delivery, low counter pressure.

### 3:1 Pressure Ratio Pumps.

Medium pressure air operated pumps for medium flow transfer of high viscosity lubricants and for oil distribution through pipework, hose reels and meters.

Part No.  
5:1 - 347100  
3:1 - 340100

Part No.  
5:1 - 348100  
3:1 - 341100

## PUMP MASTER 4 OIL PUMPS

- ▶ Double acting air operated pumps for lubricants.
- ▶ Available with two different pressure ratios: 3:1 high volume, medium pressure and 5:1, high volume, high pressure.
- ▶ All pumps include a 2" BSP height adjustable bung adaptor.

### 3:1 HV Pressure Ratio Pumps.

Medium pressure air operated pump for transfer of high viscosity lubricant and for oil distribution through pipework, hose reels and meters. High output allows simultaneous operation when used with multi outlet systems. Recommended for large flow-medium counter-pressure.

### 5:1 HD Pressure Ratio Pumps.

High pressure air operated pumps for the distribution of all types of light and heavy viscosity oils through pipework, hose reels and meters. High output allows simultaneous operation when used with multi outlet systems. Recommended for medium flow-high counter-pressure.
