

# Reel Support Stands

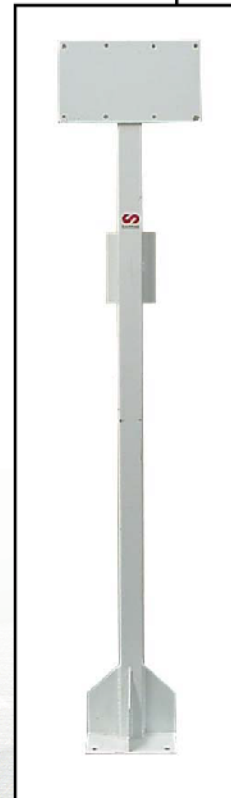

Individually designed reel stands to give secure and sturdy support of all hose reels.

Specialised reel stands can be designed and manufactured to customers own requirements.

Heavy duty reel stands are a necessary piece of apparatus when there are no suitable fixing points or walls to attach hose reels to, or the weight of the reel is too heavy to ensure a stable installation.

Stands can be built to accommodate one reel up to multiple reels and can include barrel stands and drip trays.
